

LO-PBAD Portable Badminton Base.

Applications:

Portable Steel Badminton Base allows Badminton Court Set-up without floor sockets in floor.

Material:

Steel Sheet Metal cut and formed to create a cavity which is filled with cement for weight. Post socket welded in place to accept post.

Specifications:

Designed to support a badminton pole of 47.6mm [1-7/8"] Diameter. Comes complete with 4 non-marking rubber bumpers and two non-marking wheels which engage when base is tilted back with pole.

Finish:

All welding is ground for a smooth finish; bases have a baked-on Powder coated Red finish.

Subject to design change and current manufacturing practices.
