

LO-S793A 8' x 24' Official Size Permanent Aluminum Soccer Goals

Applications: Used in outdoor field locations where no movement of soccer goal is required. Posts extend below grade to be cemented in place.

Specifications: Posts and crossbar manufactured from 3-1/2" diameter 6061 T5 extruded aluminum tube. Corners are miter cut and welded. Extruded tube design allows net hooks to be installed and not protrude beyond the diameter of the tube. 1-1/2" diameter round tube used for back braces.

Finish: All welding is ground for a smooth finish; aluminum tube has a glossy white durable finish.

Safety: All welding conducted in accordance to The Canadian Welding Bureau W47.1 Ground It is recommended to set posts in an augured hole minimum 1.2 meters (48" deep). Check with local soil conditions for anchoring, Net hooks are designed not to extend beyond the tube diameter, this eliminates the protrusions which users can potentially use to climb up onto crossbar.

Artificial Turf: Permanent goals are able to be installed on artificial turf with the addition of ground sockets. These sockets will secure the uprights and allow them to be removed. Please call for more details.

Subject to design change and current manufacturing practices.
