LO-V739A 3” Dia. Aluminum Volleyball System With Advance Height Adjustment

Applications:
Top quality Volleyball Post set, multi-height adjustments, for use in floor sockets having a 3.06” dia. (78mm). NO Pins to pull or poles to raise and lower! Simply turn the crank and the top section of the posts raises and lowers.

Material:
Post manufactured from 3” O.D. Extruded Aluminum tube for bottom section.
Upper adjustable section manufactured from 3-1/2” O.D. extruded aluminum with inner guider sleeve.
Inner Height adjustment mechanism manufactured from precisely machined beveled gears allowing infinite height adjustment by cranking the removable handle.

Specifications:
All welding certified in accordance to CSA Standard W47.1 Division #3. Each pole in the set includes a self-locking ratcheting winch with nylon webbing leader for top of net. One winch tensions the top of the net, the other tensions the bottom. Removable crank handle for raising and lowering top section of post included.

Finish:
All welding is ground for a smooth finish; Poles have a baked on Powder coated Red finish.

Available Options:
VBN500 Volleyball Net
Post Padding
Referee Stand with optional padding

Subject to design change and current manufacturing practices.
